\therefore The fractions in ascending order

$$= \frac{3}{8}, \frac{5}{13}, \frac{2}{5}, \frac{4}{9}, \frac{6}{11}$$

\therefore Fraction on 4th order = $\frac{4}{9}$

45. (D) Let the shares of A, B, C and D be Rs. $2x$, $3x$, $7x$ and $11x$ respectively.

$$\therefore 7x - 2x = 2755$$

$$(100x + 10y + z) - \frac{3}{5}(100x + 10y + z) = 90$$

$$\text{From II, } (100x + 10y + z) \times \frac{1}{4}$$

$$= (100x + 10y + z) \times \frac{25}{100}$$

We need more data.

48. (E) Data is insufficient.

49. (C) From I and II together,

$$\begin{aligned} \text{Salary of A} &= 5 \times 65780 - (88545 + 59020) \\ &= 328900 - 147565 \\ &= \text{Rs. } 181335 \end{aligned}$$

50. (A) From I,

$$\text{S. P. of 1 watch} = 15675$$

$$\text{and C. P. of 1 watch} = 15675 \times \frac{4}{5}$$

$$= \text{Rs. } 12540$$

Directions—(Q. 1–7) Read the following passage carefully and answer the questions given below it. Certain phrases in the passage have been printed in **bold** to help you locate them while answering some of the questions.

Anyone who forms his own opinions and beliefs will feel that he owes no responsibility to the majority for his conclusions. If he is a genuine lover of truth, if he is inspired by a passion for seeing things as they are and a detestation of holding ideas which do not conform to facts, he will be wholly independent of the acquiescence of those around him. When he proceeds to **apply his beliefs in the practical conduct of life**, the position is different. There are then good reasons why his attitude should be less rigid. The society in which he is placed is an ancient and composite growth. The people from whom he dissents have not come by their opinions and institutions by a process of mere haphazard. These opinions and customs all had their origin in a certain real or supposed fitness. They have a certain depth of root in the lives of a proportion of the existing generation. Their fitness for satisfying needs may have misplaced, and their congruity with one another may have come to an end. That is only one side of the truth. The most passionate propagandist cannot penetrate to them.

In common language we speak of a generation as something possessed of a kind of exact unity, with all its parts and members homogeneous. Yet plainly it is not this. It is a whole, but a whole in a state of constant flux, its factors and elements are eternally shifting. It is not one, but many generations. Each of the seven ages of man is neighbour to all the rest. The column of the veterans is already sinking into the last abyss, while the column of the newest recruits is forming.

To its tradition, the tendency and its possibilities, only a proportion of each can have nerve enough to grasp the banner of a new truth and endurance to bear it along rugged and untrodden ways.

Then we must remember the substance of which life is made. We must consider what an overwhelming preponderance of the most persistent energies and most concentrated interests of a society must be absorbed between material cares and the solitude of the affections. It is obviously unreasonable to lose patience and quarrel with one's time because it is tardy in throwing off its institutions and beliefs, and slow to achieve the transformation which is the problem in front of it. Men and women have to live. The task for most of us is hard enough to make us well pleased with even such imperfect shelter as we find in daily use and customs. To insist on a whole community being made at once to submit to the supremacy of new practices and ideas that have just begun to acclaim themselves to the most advanced speculative intelligence of the time. This, even if it were a possible process, would do much to make life impracticable and to hurry on social dissolution.
